DETAILED ACTION

This Office action is response to the applicant's amendment filed on 6/24/03.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3, 5, and 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 1, A phrase "connected to a parent plate via a connection part" is confusing because examiner uncertain whether a parent plate is a connecting part or used as truss member connectors such as upper and lower chords; a phrase "by constrained pattern shaping... said connection part is connected to said parent plate via a bolt opening" matter of fact the "bolt openings" do not make a connection; and also "with said flat section which includes a respective transitional slack portion at both ends of the semi-circular boundary of the tubular section" they are all confusing.

In regard to claim 2 having the similar issues as claim 1. Specifically, the whole paragraph 3 is confusing such as "a curve surface which formed integrally with and ...".

In regard claim 5 having the similar issues as claims 1 and 2 (see in paragraph 2).

Examiner uncertain if there is more than one different "flat section". With regard to claim 8, a phrase "said flat section is tapered to allow for each flat section of each chord member to be positioned in close proximity" is confusing. And with regard to claims 9 and 10 the phrase " two bolt connection centers..." is confusing.

Allowable Subject Matter

3. Claims 1, 2, 5 and dependent claims 3, 8-10 are allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office Action. A final determination will be made when the rejection of the claims under 112 has been overcome.
4. No prior art of record shows truss elements having connecting plate formed by tubular pipe and a defining semi-circular boundary with the flat section including a slack portion as claimed, nor any motivation to do so.

Response to Arguments

5. Applicant's arguments filed 6/24/03 have been fully considered but they are not persuasive because the applicant's amendment still not overcomes the 112 rejections (see above rejections).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
